TERRATEC PRODUCTINFO

Current as of: 09/21/99

TerraTec ActiveRadio upgrade.

The TerraTec ActiveRadio upgrade module and the highly acclaimed Base 1/64, EWS 64 S and Xlerate soundcards combine to give you the highest quality FM Radio Receiver system available for your PC. The module has been designed to coexist with your Base 1/64 the EWS 64 S and the XLerate, providing exceptionally high quality stereo music, with the option of applying effects such as 3D-Sound (Vspace™) from your Base 1. Other features include a powerful RDS decoder allowing you to view RDS information transmitted from your favorite radio stations.
